## SOLAR ENERGY CITY LUND

Venue: Vattenhallen Science Center

Check in and coffee: 10.00

### Challenge: Solar Energy City Lund

The solar energy market is growing fast in Sweden, but we are still far behind our neighboring countries Germany and Denmark, despite similar conditions looking at insolation. Our goal is that Lund, within five years, will be the number one producing municipality of solar electricity in Sweden per capita. To reach this goal we need innovative solutions such as:

- Technical solutions making the solar photovoltaic systems more effective, new kinds of PV, etcetera
- Planning tools that lead to more solar power plants
- Design and development of attractive solar photovoltaic systems that have a positive impact on the cityscape, the architecture of buildings, etcetera
- New business models and forms of cooperation that develops shared ownership of solar photovoltaic systems
- Methods that increase the acceptance, knowledge and willingness to invest in solar energy.

## Practical details

Please join us for check in and coffee from 10.00 when we open the doors.

The Climathon begins at 11.00 AM sharp and finishes 24 hours later. Bring any personal items you need or wish to have at hand during the 24 hours. E.g. a toothbrush, extra clothes, mobile charger, glasses etc. Please also bring a computer if possible.

We will provide vegan food, coffee, tea, water, fruit, and sweets during the 24 hours. If there is a personal snack or meal you want please bring it. You can also bring a sleeping bag and a pillow if you want to nap or sleep during the night. Usually people get so excited that they work through the night.

We will create groups based on competences and interests and you may also form your own group.

The Climathon will be in Swedish, but we will support any participants who are not fluent in Swedish.

Please use the [#climathon](#) and [#climathonlund](#) hashtag when tweeting before, during and after the event.

The next morning we will move to Ideon Square (Scheelevägen 15) where the panel will listen to the pitches and vote for the best solution. The pitch session will be open to people interested in the Climathon solutions.

## Address

Vattenhallen Science Center, John Ericssons väg 1, Lund

## Contact information

If you have any questions or need to get in touch before or during the event:  
[ulrika.celinwedid@lund.se](mailto:ulrika.celinwedid@lund.se), [climate-kic@cec.lu.se](mailto:climate-kic@cec.lu.se)

## Jury

*Emma Berginger, Deputy Mayor, The Green Party, Deputy Chairman of the Municipal Council and Chairman of the Technical Board in Lund Municipality*

*Sylvia Michel, CEO, Kraftringen*

*Bertil Lundstöm, Technical director, Lunds Kommuns Fastighets AB (LKF)*

*Lars J Nilsson, Professor at Environmental and Energy Systems Studies, Lund University*

*Bodil Rosvall Jönsson, CEO, BRJ Management AB*

## Partners

Municipality of Lund, Lund University and Kraftringen Climate-KIC Nordic

Climate-KIC is supported by the EIT, a body of the European Union
