

# Innovation & Entrepreneurship Solving Climate Challenges

**TUESDAY 16 MAY 13.00–16.00 & 16.00–18.00, IDEON SQUARE, IDEON AGORA.**

In order to meet the challenges of climate change, we need to find innovative solutions, products and services to reduce greenhouse gas emissions and to adapt the society. Lund University is partner to Climate-KIC, which offers possibilities to explore innovative ideas, strengthen entrepreneurs and educate students and professionals in these issues.

This seminar inspires to explore your innovative ideas and give you information on how to access the possibilities within Climate-KIC and find collaboration partners. It targets researchers, students, entrepreneurs, start-ups, companies and others interested in innovation opportunities related to climate change.

Also between 16–18 at the same location, join our VentureCafé, organised together with VentureLab and Sten K. Johnson Centre for Entrepreneurship. Meet and discuss with the speakers, Climate-KIC and others interested in climate, innovation and entrepreneurship.

## Programme Climate-KIC Workshop, 13.00–16.00:
